PROFESSIONAL SUMMARY

Mobile Application Developer with 3+ years of Flutter and iOS development experience, including 2+ years shipping production apps for Android and iOS. Sole developer of two published apps with 250K+ combined downloads, including a news app with 250K+ downloads, 13.2K reviews, and a 4.9-star rating. Skilled in Flutter, Dart, Swift, Firebase, REST APIs, offline-first architecture, native platform integrations (Method Channels), and App Store / Google Play deployment. Experienced across education, news, events, productivity, scanning, sports, social, and food-delivery domains.

CORE SKILLS

- **Languages:** Dart, Swift, Kotlin, Java, C++
- **Mobile:** Flutter, iOS (UIKit, SwiftUI), Android
- **State Management:** Riverpod, Bloc, Provider
- **Backend & APIs:** REST APIs, Firebase, Cloud Firestore, Google Drive API
- **Databases:** SQLite, Hive, Cloud Firestore
- **Native Integrations:** Method Channels, Local Notifications, Location Monitoring, In-App Purchase, App Widgets, Live Activities
- **Tools & Platforms:** Git, Android Studio, Xcode, VS Code, Figma | Android, iOS, Web

PROFESSIONAL EXPERIENCE

Flutter & iOS Developer — GTS Infosoft LLP

Jan 2024 – Present

Started as Flutter Developer; expanded into native iOS development from Jul 2024.

- Developed and maintained cross-platform Flutter applications and native iOS applications for a portfolio of production apps across Android, iOS, and the App Store / Google Play.
- Built native iOS features and managed the full release pipeline — certificates, provisioning profiles, App Store submissions, and production issue resolution.
- Integrated REST APIs, Firebase services, local databases (SQLite, Hive), and platform-specific native functionality via Method Channels.
- Implemented local notifications, location monitoring, subscriptions, and in-app purchase flows across multiple client apps.
- Applied state management (Riverpod, Bloc, Provider) suited to each project's architecture and scale.
- Collaborated with designers and backend developers to ship polished, production-grade mobile apps on schedule.

Flutter Intern — Open Innovations Lab

Sep 2023 – Nov 2023

- Developed Flutter UI and API integrations, contributing production-ready application features under senior guidance.
- Worked with Git, Firebase, and REST APIs in a collaborative team development workflow.

FEATURED PROJECTS

Khoj Samachar — Solely Developed • 250K+ Downloads • 13.2K Reviews • 4.9★

Technologies: Flutter, Dart, Method Channels, Native Android, Push Notifications

- Solely developed the official mobile app for Khoj Samachar, a large-scale news app for Android and iOS.
- Wrote native Android code for a home-screen widget displaying calendar event details, with automatic daily refresh at 00:01.
- Built a custom native persistent notification view that stays visible and non-dismissible.
- Implemented notification scheduling natively through Method Channels, avoiding third-party notification packages.

[Android](#) | [iOS](#)

PaathBook — Personal Product • Solely Developed • 2.6K+ Downloads • 5.0★

Technologies: Flutter, Firebase, SQLite, Method Channels, PDF Tools

- Solely developed a privacy-focused educational app for Nepali GK, grammar, quizzes, bilingual content, and PDF utilities.
- Built an offline-first Firebase-to-SQLite sync architecture that serves content locally and fetches from Firebase only when new data exists — reducing backend reads and billing cost.

- Implemented native notification scheduling and deep-link redirection from native code into Flutter, without a third-party notification package.

[Android](#) | [iOS](#)

PathBook Bhasa — *Personal Product* • *Solely Developing*

Technologies: Flutter, Riverpod, Localization, Offline Dictionary, AI Fallback

- Designing and developing a reading-first language learning app centered on stories, vocabulary, conversations, and contextual learning.
- Architected multilingual localization with a scalable Riverpod structure, plus an offline dictionary, word normalization, and AI-assisted fallback.

[Google Play](#)

WikiBG — *Solely Developed* • *3K+ Downloads*

Technologies: Flutter, Dart, Web Integration, Content Platform

- Solely developed the official mobile app connected to the WikiBG biography and documentation platform.
- Built a clean mobile reading experience for editorially reviewed, verification-first content.

[Android](#) | [iOS](#)

DartsKey

Technologies: Flutter, Bluetooth, Realtime Sync, In-App Purchase, Game Logic

- Implemented in-app purchase flows for premium access and monetized features.
- Wrote core darts game logic covering scoring, match flow, and gameplay rules.
- Contributed to multiplayer sync, analytics, and performance-sensitive gameplay features.

[Android](#) | [iOS](#)

Timelee — **iOS**

Technologies: Swift, Local Notifications, Location Monitoring, Offline Sync, In-App Purchase

- Built reminder workflows using local and location-based notifications, triggered on entering or exiting selected locations.
- Managed daily, weekly, and intra-day repeating reminder schedules.
- Implemented subscription plans and one-time token purchase flows, with offline-first storage syncing to the server when online.

[iOS](#)

ScanPix — **iOS**

Technologies: Swift, PDF, Edge Detection, Offline Sync, In-App Purchase

- Built a professional document scanner with edge detection, capture enhancement, and editing tools.
- Added background removal and password-protected file handling, plus in-app purchase flows for premium scanner features.

OTHER PROFESSIONAL PROJECTS

- **EventLocal:** Built Flutter features for event networking, live event information, chat, notifications, and participant contact exchange.
- **The Academix:** Developed Flutter features for course management, live classes, QR attendance, assessments, and Google Drive integration.
- **Bender:** Implemented iOS social discovery, messaging, location-based features, profile management, and in-app purchases.
- **Food Dudes:** Developed iOS food delivery features including restaurant discovery, ordering, menu management, and delivery tracking.
- **Coaching Zone:** Developed coaching management, team management, video content, and subscription workflow features for iOS.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024

Jai Narain Vyas University / Lucky Institute of Professional Studies — Jodhpur, Rajasthan, India

Intermediate in Science (I.Sc.)

2017 – 2019

Kailali Model Secondary School — Dhangadhi, Kailali, Nepal
