PROFESSIONAL SUMMARY

Flutter & iOS Developer with 3+ years of professional experience building production-ready Flutter and iOS applications for Android and iOS. Skilled in Flutter, Dart, Swift, Firebase, REST APIs, local databases, method channels, offline-first architecture, App Store deployment, Google Play deployment, in-app purchases, notifications, and native platform integrations. Experienced in delivering real-world apps across education, news, events, productivity, scanning, sports, pet care, live video marketplaces, social networking, and food delivery domains.

TECHNICAL SKILLS

Languages	Dart, Swift, Kotlin, Java, C++
Frameworks & SDKs	Flutter, UIKit, SwiftUI, Core Location, UserNotifications
Backend & APIs	Firebase, REST APIs, Cloud Firestore, Google Drive API
State Management	Riverpod, Bloc, Provider, ValueNotifier
Databases	SQLite, Hive, Cloud Firestore
Mobile Technologies	Method Channels, Push Notifications, Local Notifications, Android Widgets, Live Activities, In-App Purchase, Offline-first Architecture
Tools & Platforms	Git, Android Studio, Xcode, VS Code, Figma | Android, iOS, Web

PROFESSIONAL EXPERIENCE

Flutter Developer | **GTS Infosoft LLP** — Jan 2024 – Oct 2026

- Developed and maintained cross-platform Flutter applications for Android and iOS.
- Integrated REST APIs, Firebase, SQLite, Hive, and state management solutions including Riverpod, Bloc, and Provider.
- Implemented platform-specific functionality using Method Channels.
- Optimized application performance, stability, and production reliability.
- Collaborated with designers and backend developers to deliver high-quality mobile applications.

iOS Developer | **GTS Infosoft LLP** — Jul 2024 – Oct 2026

- Built and maintained production native iOS applications using Swift.
- Managed App Store releases, certificates, provisioning profiles, and iOS deployment.
- Implemented local notifications, location monitoring, subscriptions, and in-app purchases.
- Integrated REST APIs, offline storage, and platform-specific Apple frameworks.
- Ensured smooth performance and reliability across Apple devices.

Flutter Intern | **Open Innovations Lab** — Sep 2023 – Nov 2023

- Developed Flutter UI, API integrations, and production-ready application features.
- Worked with Git, Firebase, REST APIs, and collaborative development workflows.

Flutter Training | **Open Innovations Lab** — Jun 2023 – Aug 2023

- Completed intensive Flutter training covering Dart, Firebase, REST APIs, state management, and application architecture.

FLUTTER PROJECTS

Dkrop • Official mobile app for Dkrop Media Group · English, Nepali, and Hindi — **Android** | **iOS** | **Website**

Tech: Multilingual News Platform, PDF Utilities, Account Sync

- Built an all-in-one app for Dkrop's three news editions, with breaking news, investigations, analysis, and membership features.
- Combined Nepali calendar and date conversion, tasks and reminders, document scanning and PDF tools, calculators, market rates, public resources, and 25+ games.
- Supported multilingual reading, saved articles, reading preferences, and connected account access across supported editions.

FLUTTER PROJECTS (CONTINUED)

Khoj Samachar • Solely Developed • 250K+ Downloads • 13.2K Reviews • ★4.9 — **Android | iOS**

Tech: Method Channels, Native Android, Push Notifications

- Built a native Android Home Screen Widget with automatic daily refresh.
- Implemented notification scheduling through Method Channels without third-party plugins.
- Optimized application performance for a large production user base.

PaathBook • Personal Product • 2.6K+ Downloads • ★5.0 — **Android | iOS**

Tech: Firebase, SQLite, Method Channels, PDF Tools

- Solely developed a privacy-focused educational application for Android and iOS.
- Designed an offline-first Firebase-to-SQLite synchronization architecture reducing backend reads.
- Implemented native notification scheduling and deep-link navigation through Method Channels.
- Built quizzes, grammar modules, bilingual learning content, and PDF utilities.

PathBook Bhasa • Personal Product — **Android**

Tech: Riverpod, Localization, Offline Dictionary, AI Fallback

- Designed and solely developing a reading-first language learning application.
- Architected multilingual localization with scalable Riverpod architecture.
- Built offline dictionary, word normalization, and AI-assisted fallback; designed contextual learning through stories, conversations, vocabulary, and gamified progress.

Kova • Pet Care & Health Tracking — **Android | iOS (Pending Release)**

Tech: REST APIs, QR Code Tagging, Push Notifications, Local Storage

- Developed a cross-platform pet care and health tracking application for managing multiple pet profiles and medical records (vaccinations, documents, weight).
- Built scheduled reminders for medication and appointments; integrated QR tag linking, family sharing, and lost pet recovery workflows.

DartsKey — **Android | iOS (Pending)**

Bluetooth, Realtime Sync, IAP, Game Logic

Implemented premium in-app purchase monetization, core darts match scoring rules, and realtime synchronization for performance-sensitive gameplay.

WikiBG — **Android | iOS**

Editorial Platform • 3K+ Downloads

Solely developed official applications delivering a clean reading experience for editorially reviewed biography content with optimized accessibility.

NATIVE IOS PROJECTS

Timelee — **iOS**

- Built reminder workflows with local and location-based notifications.
- Implemented offline-first local storage with server synchronization.

ScanPix — **iOS**

- Built document scanner with edge detection and editing tools.
- Implemented premium scanner functionality and in-app purchases.

Meet — **iOS**

- Developed 1-on-1 video chat marketplace features with timer & auto-connection.
- Implemented in-app calendar scheduling, pay-per-minute pricing, and accounting.

Coaching Zone — **iOS**

- Developed coaching management, Team Management, and video features.
- Implemented App Store auto-renewing subscription workflows.

OTHER PROFESSIONAL PROJECTS

- **EventLocal:** Built Flutter features for event networking, live event information, chat, notifications, and participant contact exchange.
- **The Academix:** Developed Flutter features for course management, live classes, QR attendance, assessments, and Google Drive integration.
- **Bender:** Implemented iOS social discovery, messaging, location-based features, profile management, and in-app purchases.
- **Food Dudes:** Developed iOS food delivery features including restaurant discovery, ordering, menu management, and delivery tracking.

EDUCATION

Bachelor of Computer Applications (BCA) — 2021 – 2024

Jai Narain Vyas University / Lucky Institute of Professional Studies · Jodhpur, Rajasthan, India

Intermediate in Science (I.Sc.) — 2017 – 2019
