### PROFESSIONAL SUMMARY

Flutter & iOS Developer with 3+ years of Flutter development experience (training, internship, and professional), including 2+ years of full-time professional experience building production Android and iOS applications. Experienced in Flutter, Dart, Swift, REST APIs, Firebase, SQLite, Hive, Riverpod, Bloc, Method Channels, offline-first architecture, native Android & iOS development, App Store & Google Play deployment, and performance optimization. Passionate about building scalable, production-ready mobile applications.

### PROFESSIONAL EXPERIENCE

**Flutter Developer — GTS Infosoft LLP** Jan 2024 – Present

- Developed and maintained cross-platform Flutter applications for Android and iOS.
- Integrated REST APIs, Firebase, SQLite, Hive, and state management solutions including Riverpod, Bloc, and Provider.
- Implemented platform-specific functionality using Method Channels.
- Optimized application performance, stability, and production reliability.
- Collaborated with designers and backend developers to deliver high-quality mobile applications.

**iOS Developer — GTS Infosoft LLP** Jul 2024 – Present

- Built and maintained production native iOS applications using Swift.
- Managed App Store releases, certificates, provisioning profiles, and iOS deployment.
- Implemented local notifications, location monitoring, subscriptions, and in-app purchases.
- Integrated REST APIs, offline storage, and platform-specific Apple frameworks.
- Ensured smooth performance and reliability across Apple devices.

**Flutter Intern — Open Innovations Lab** Sep 2023 – Nov 2023

- Developed Flutter UI, API integrations, and production-ready application features.
- Worked with Git, Firebase, REST APIs, and collaborative development workflows.

**Flutter Training — Open Innovations Lab** Jun 2023 – Aug 2023

Completed intensive Flutter training covering Dart, Firebase, REST APIs, state management, and application architecture.

### TECHNICAL SKILLS

|                     |                                                                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Languages           | Dart, Swift, Kotlin, Java, C++                                                                                                          |
| Frameworks & SDKs   | Flutter, UIKit, SwiftUI, Core Location, UserNotifications                                                                               |
| Backend & APIs      | Firebase, REST APIs, Cloud Firestore, Google Drive API                                                                                  |
| State & DB          | Riverpod, Bloc, Provider, SQLite, Hive, Cloud Firestore                                                                                 |
| Mobile Technologies | Method Channels, Push Notifications, Local Notifications, Android Widgets, Live Activities, In-App Purchase, Offline-first Architecture |
| Tools & Platforms   | Git, Android Studio, Xcode, VS Code, Figma   Android, iOS, Web                                                                          |

### FLUTTER PROJECTS

**PathBook Bhasa** | Personal Product Store: [Android](#)

- Technologies:** Flutter, Riverpod, Localization, Offline Dictionary, AI Fallback
- Designed and solely developing a reading-first language learning application.
  - Architected multilingual localization with scalable Riverpod architecture.
  - Built offline dictionary, word normalization, and AI-assisted fallback.
  - Designed contextual learning through stories, conversations, vocabulary, and gamified progress.

**PaathBook** | Personal Product • 2.6K+ Downloads • ★5.0

Store: [Android](#) | [iOS](#)

**Technologies:** Flutter, Firebase, SQLite, Method Channels, PDF Tools

- Solely developed a privacy-focused educational application for Android and iOS.
- Designed an offline-first Firebase-to-SQLite synchronization architecture reducing backend reads.
- Implemented native notification scheduling and deep-link navigation through Method Channels.
- Built quizzes, grammar modules, bilingual learning content, and PDF utilities.

**Khoj Samachar** | Solely Developed • 250K+ Downloads • 13.2K Reviews • ★4.9

Store: [Android](#) | [iOS](#)

**Technologies:** Flutter, Method Channels, Native Android, Push Notifications

- Built a native Android Home Screen Widget with automatic daily refresh.
- Implemented notification scheduling through Method Channels without third-party plugins.
- Optimized application performance for a large production user base.

**WikiBG** | Solely Developed • 3K+ Downloads

Store: [Android](#) | [iOS](#)

**Technologies:** Flutter, Editorial Platform

- Solely developed the official Android and iOS applications.
- Built a clean reading experience for editorially reviewed biography content.
- Optimized navigation and content accessibility.

## NATIVE IOS PROJECTS

---

**Timelee**

Store: [iOS](#)

- Built reminder workflows with local and location-based notifications.
- Implemented offline-first local storage with server synchronization.

**ScanPix**

Store: [iOS](#)

- Built document scanner with edge detection and editing tools.
- Implemented premium scanner functionality and in-app purchases.

**Coaching Zone**

Store: [iOS](#)

- Developed coaching management, Team Management, Video Content features and subscription workflows.

## OTHER PROFESSIONAL PROJECTS

---

- **EventLocal:** Built Flutter features for event networking, live event information, chat, notifications, and participant contact exchange.
- **The Academix:** Developed Flutter features for course management, live classes, QR attendance, assessments, and Google Drive integration.
- **Bender:** Implemented iOS social discovery, messaging, location-based features, profile management, and in-app purchases.
- **Food Dudes:** Developed iOS food delivery features including restaurant discovery, ordering, menu management, and delivery tracking.

## EDUCATION

---

**Bachelor of Computer Applications (BCA)**

2021–2024

Jai Narain Vyas University / Lucky Institute of Professional Studies — Jodhpur, Rajasthan, India

**Intermediate in Science (I.Sc.)**

2017–2019

Kailali Model Secondary School — Dhangadhi, Kailali, Nepal
